

New Ramp at Wildwood Park

The City of Florence Water and Wastewater Department has built a new ramp at Wildwood Park, which was initiated by Florence City Council Member Angie Pickens in 2005.

On Saturday, August 8, 2009, many volunteers helped place rocks around the new concrete ramp to help prevent erosion on the creek bank. This new ramp will help make it easier to get canoes and kayaks out of the water.

A \$3,000 matching grant from the Northwest Alabama Resource Conservation and Development program helped pay for the ramp, which is a joint project of the development agency, the City of Florence, Tennessee Valley Authority, Garver Engineers, Alabama Outdoors, and Christopher Plumbing and Electric, Inc.
